TRADE UNION OF BUILDERS AND RELATED PROFESSIONS OF GREECE

concrete workers, concrete blacksmiths, mortars (plasterers), masons, PAINTERS, floor and tile mosaics, tile makers, pavers, general floor cutters, cobblers, bricklayers Cutting and laying marble, plasterers, plasterboard builders and builders, glassmakers, miners, sewer workers, antiquities excavators and restoratives, excavators and excavators of all kinds, plasterers and general construction workers, contractors, in all kinds of insulation, stone and marble quarries, workers in the works of excavation, construction and repair of road networks, workers in the construction of asphalt pavements, roads and sidewalks, your workers construction, production, transport and spraying of ready-mixed concrete, worker in the construction and repair of ports, schools, hospitals, airports, major technical infrastructure projects, ground, underground, submarine, tunnels, links, technical works and infrastructure projects of civil engineering, sewerage networks and their maintenance, workers in technical projects, networks workers in scaffolding, resins, concrete workers, carpenters, window framers, construction site general workers, as well as construction foremen, technical assistants, surveyors of technical companies, consortia, general construction with the industry and the production process in the execution of the construction works of large technical infrastructure projects, civil engineering technical works, workers of all nature and specialty in metallurgical, mechanical, electrical, wood installation and maintenance works, operators and drivers of all kinds and underwear transport, installation of materials, hoists, excavators, cranes, earthmoving, drilling and other machinery and specialties not specifically named, as well as their assistants on the construction sites necessary in the production process of the execution of the said projects, except the senior other specialties that will exist in the course of the production process in the sector covered by the Union, etc.

Institute of Coating Technologies

Who we are

The Institute of Coating Technologies (**IoCT**) was created in 2019 by coating industry executives with the mission to bring together the Greek scientific community, technical staff and all stakeholders related to coatings research, education and profession. The establishment of the Institute was dictated by the need to create an organization of public expression and communication for all who wish the development of coating community in Greece.

Institute of Coating Technologies

Vocational Education and Training

Training programme of Coating Applicator Specialist

- Hours: 64
- Training modules: 5
- 48 hours coursework
- 16 hours e-learning

ISO 17024

iNSTITUTE
of Coating Technologies

Institute of Coating Technologies

Vocational Education and Training

Institute of Coating Technologies

IoCT Club
Reward Scheme for IoCT trainees
Discount in training, tools & PPE

Implementation of 3D printing and VR techniques in our courses

Under the hood.....

Workshops to bring our members to the front line of the latest commercial and residential trends

Training of industry newcomers

Seminars to disseminate coating technology to all stakeholders (engineers, interior designers, paint contractors, architects, manufacturers)

Consulting

Institute of Coating Technologies

Collaborations

Planning new courses for Greek market

Greek Universities and Research Centers

Member of UNIEP since October 2020

Research on new preservation systems

Frosio course in Greek market

Institute of Coating Technologies

Thank you for your attention!
